

Social Change Ecosystem

Adapting Deepa Iyer's Social Change Ecosystem Map — a framework that **identifies ten key roles people can play in movements and communities** — Park Day helps TK-8 students understand their part in creating caring and interdependent communities. The Social Change Ecosystem connects directly to best practices in **progressive education** and Park Day's **social justice mission**.

How does the Social Change Ecosystem work?

- Helps students **see themselves reflected** in roles that contribute to healthy friendships & communities.
- Gives students **explicit, expansive and shared language** to discuss social justice topics!
- Makes interdisciplinary connections (literacy, math, social studies, science, art, and PE) to **ground changemaking in core academics**.
